Professional Summary

Full Stack Developer with 4+ years of experience building end-to-end web applications. I have built internal and SaaS platforms from scratch using React and Angular on the frontend, NestJS and .NET 8 on the backend, and PostgreSQL or SQL Server as databases, deploying them on AWS (EC2 and S3). I focus on turning unstable systems into solid, modular, and user-friendly solutions. Seeking a remote full stack role on a product team.

Professional Experience

Full Stack Developer, Consortium Legal – Guatemala (hybrid) June 2025 – present

- Rebuilt from scratch the internal administrative platform of one of the largest law firms in Central America (250+ lawyers and 9 offices), which suffered frequent outages on the server where it was hosted.
- Migrated and rewrote the existing modules (accounting, human resources, and administration) and built new ones, including a vacation management module that simplified requesting and approving leave for lawyers and their teams.
- Develop with React (frontend), NestJS (backend), and PostgreSQL; store and manage documents in Amazon S3 and deploy the application on an AWS EC2 instance.
- Design REST APIs and structure the backend into modules to ease maintenance and the addition of new features.

Web Developer (freelance), PCA Innovation – Remote May 2025 – June 2026

- Hired to develop the new version of IMS Execution, a strategic management and objective-execution platform (innovation, projects, performance, and competency assessment) used by companies across the region.
- Built the frontend with Angular and the backend with .NET 8 on SQL Server, including REST APIs and data modeling for the platform's modules.
- Worked autonomously and remotely, coordinating directly with the consulting firm's team.

Junior Developer (part-time), San Martín Bakery – Guatemala Oct 2023 – Aug 2024

- Maintained and improved the company's e-commerce site, optimizing the shopping experience and reducing errors by 35%.
- Led the migration of the online store from WooCommerce/WordPress to an in-house platform built with Node.js, Vue.js, and SQL Server, improving performance and scalability.
- Reduced frontend load times by 30% through code improvements; integrated payment and logistics APIs.
- Deployed and maintained applications in AWS environments.

Software Support and Quality Analyst, Procesos Eficientes S. A. – Remote May 2022 – Aug 2023

- Provided technical support and resolved incidents in the enterprise management system through Helpdesk, improving response times.
- Optimized SQL Server queries using bulk data processing, reducing execution times by more than 30%.
- Helped debug and maintain .NET software, fixing critical bugs.
- Tuned server and database configurations to prevent outages and used secure VPNs to manage remote databases.

Junior Developer (internship), Is4Tech – Remote Sept 2021 – Dec 2021

- Helped build and maintain microservices with Java and Spring Boot, and deploy them on AWS.
- Tested and debugged backend systems, reducing production errors.

Education

Universidad del Valle de Guatemala (UVG), B.S. in Computer Science and Information Technology Engineering – Guatemala — Jan 2022 – present

Centro Educativo Técnico Laboral Kinal, Technical Diploma in Computing – Guatemala — Jan 2019 – Dec 2021

Technical Skills

Frontend: React, Angular, Vue.js, TypeScript, JavaScript, HTML, CSS

Backend: NestJS, Node.js, .NET 8 (C#), Java, Spring Boot, REST APIs

Databases: PostgreSQL, SQL Server (query optimization, indexes, and stored procedures)

Cloud and Tools: AWS (EC2, S3), Git, Jira

Languages

Spanish: Native

English: Developing (technical reading)
